

# Bioenvironmental Engineering

Hours of Operation: Monday – Friday, 0700-1600

Respirator and Gas Mask Fit Testing: Monday – Thursday 0730 – 1100 & 1200- 1530  
734-7844 (DSN 884-7844)

Location: 8941 Entrance Rd A, Building 3334, Second Floor

## Bioenvironmental Engineering Flight (BEF)

The primary focus of BEF is to identify, assess and determine control measures to protect the health of Air Force personnel in the workplace. The flight provides health surveillance through sampling, identification, quantification, assessment, risk communication, control and documentation of potential exposures.

In addition, BEF plans, prepares for, and provides real time CBRN response; ensures safe potable/non-potable water; and performs specialized vulnerability assessments for drinking water, toxic industrial chemicals and toxic industrial materials.
